

North County Property Group Introduces New Property Management Service Programs in San Diego County

Standard and Premium Program levels to offer unique features and property management services tailored to the specific needs of property owners.

DEL MAR, Calif. ([PRWEB](#)) January 21, 2019 -- North County Property Group, the fastest growing and top ranked property management company in San Diego County, has announced the launch of a new program structure for its property management services. The company will now provide two tiers of program levels with unique features at each tailored to the specific needs of its property owners.

North County Property Group clients will have a choice between the Standard Property Management Program or Premium Property Management Program. The Standard Program provides the legacy services North County Property Group has offered to its property owners for over 18 years. The Premium Program, as the name suggests, offers owners of upscale homes an enhanced set of services such as a 30-day to Lease Guarantee, Eviction Protection, and no-cost facilitation on property maintenance.

Both the Standard and Premium Programs will include a new North County Property Group exclusive called Listing Tracker Dashboard. The Listing Tracker Dashboard is a value-added service which provides a graphical analysis specific to each owner's property when is actively listed on the market for rent. The dashboard provides an overview of the volume of inquiries, communication with potential renters, property showings, rental applications, and overall performance based on days on market.

"The new programs offer each client a choice of what is important to them for property management of their particular rental home," said Bob Preston, President and Broker/Officer at North County Property Group. "The service features of the programs are the result of years of experience and exceptional feedback received from our customer base."
